## Gandhiji's Talisman

*I will give you a talisman. Whenever you are in doubt or when the self becomes too much with you, apply the following test:*

*Recall the face of the poorest and the weakest man whom you may have seen and ask yourself if the step you contemplate is going to be of any use to him. Will he gain anything by it? Will it restore him to a control over his own life and destiny? In other words, will it lead to Swaraj for the hungry and spiritually starving millions?*

*Then you will find your doubts and your self melting away.*

*M.K. Gandhi*

## FOREWORD

---

**T**he Pandit Sunderlal Sharma Central Institute of Vocational Education (PSSCIVE) a constituent of the National Council of Educational Research and Training (NCERT) is spearheading the efforts of developing learning outcome based curricula and courseware aimed at integrating both vocational and general qualifications to open pathways of career progression for students. It is a part of Centrally Sponsored Scheme of Vocationalisation of Secondary and Higher Secondary Education (CSSVSHSE) launched by the Ministry of Human Resource Development, Government of India in 2012. The PSS Central Institute of Vocational Education (PSSCIVE) is developing curricula under the project approved by the Project Approval Board (PAB) of *Rashtriya Madhyamik Shiksha Abhiyan* (RMSA). The main purpose of the competency based curricula is to bring about the improvement in teaching-learning process and working competences through learning outcomes embedded in the vocational subject.

It is a matter of great pleasure to introduce this learning outcome based curriculum as part of the vocational training packages for the job role of **Telecom - Optical Fibre Splicer**. The curriculum has been developed for the secondary students of vocational education and is aligned to the National Occupation Standards (NOSs) of a job role identified and approved under the National Skill Qualification Framework (NSQF).

The curriculum aims to provide children with employability and vocational skills to support occupational mobility and lifelong learning. It will help them to acquire specific occupational skills that meet employers' immediate needs. The teaching process is to be performed through the interactive sessions in classrooms, practical activities in laboratories and workshops, projects, field visits, and professional experiences.

The curriculum has been developed and reviewed by a group of experts and their contributions are greatly acknowledged. The utility of the curriculum will be adjudged by the qualitative improvement that it brings about in teaching-learning. The feedback and suggestions on the content by the teachers and other stakeholders will be of immense value to us in bringing about further improvement in this document.

**Hrushikesh Senapaty**  
**Director**  
**National Council of Educational Research & Training**

## PREFACE

---

India today stands poised at a very exciting juncture in its saga. The potential for achieving inclusive growth are immense and the possibilities are equally exciting. The world is looking at us to deliver sustainable growth and progress. To meet the growing expectations, India will largely depend upon its young workforce. The much-discussed demographic dividend will bring sustaining benefits only if this young workforce is skilled and its potential is channelized in the right direction.

In order to fulfil the growing aspirations of our youth and the demand of skilled human resource, the Ministry of Human Resource Development (MHRD), Government of India introduced the revised Centrally Sponsored Scheme of Vocationalisation of Secondary and Higher Secondary Education that aims to provide for the diversification of educational opportunities so as to enhance individual employability, reduce the mismatch between demand and supply of skilled manpower and provide an alternative for those pursuing higher education. For spearheading the scheme, the PSS Central Institute of Vocational Education (PSSCIVE) was entrusted the responsibility to develop learning outcome based curricula, student workbooks, teacher handbooks and e-learning materials for the job roles in various sectors, with growth potential for employment.

The PSSCIVE firmly believes that the vocationalisation of education in the nation need to be established on a strong footing of philosophical, cultural and sociological traditions and it should aptly address the needs and aspirations of the students besides meeting the skill demands of the industry. The curriculum, therefore, aims at developing the desired professional, managerial and communication skills to fulfil the needs of the society and the world of work. In order to honour its commitment to the nation, the PSSCIVE has initiated the work on developing learning outcome based curricula with the involvement of faculty members and leading experts in respective fields. It is being done through the concerted efforts of leading academicians, professionals, policy makers, partner institutions, Vocational Education and Training experts, industry representatives, and teachers. The expert group through a series of consultations, working group meetings and use of reference materials develops a National Curriculum. Currently, the Institute is working on developing curricula and courseware for over 100 job roles in various sectors.

We extend our gratitude to all the contributors for selflessly sharing their precious knowledge, acclaimed expertise, and valuable time and positively responding to our request for development of curriculum. We are grateful to MHRD and NCERT for the financial support and cooperation in realising the objective of providing learning outcome based modular curricula and courseware to the States and other stakeholders under the PAB (Project Approval Board) approved project of *Rashtriya Madhyamik Shiksha Abhiyan* (RMSA) of MHRD.

Finally, for transforming the proposed curriculum design into a vibrant reality of implementation, all the institutions involved in the delivery system shall have to come together with a firm commitment and they should secure optimal community support. The success of this curriculum depends upon its effective implementation and it is expected that the managers of vocational education and training system, including subject teachers will make efforts to create better facilities, develop linkages with the world of work and foster a conducive environment as per the content of the curriculum document.

The PSSCIVE, Bhopal remains committed in bringing about reforms in the vocational education and training system through the learner-centric curricula and courseware. We hope that this document will prove useful in turning out more competent Indian workforce for the 21<sup>st</sup> Century.

RAJESH P. KHAMBAYAT

*Joint Director*

*PSS Central Institute of Vocational Education*

## **ACKNOWLEDGMENT**

---

On behalf of the team at the PSS Central Institute of Vocational Education (PSSCIVE) we are grateful to the members of the Project Approval Board (PAB) of Rashtriya Madhyamik Shiksha Abhiyan (RMSA) and the officials of the Ministry of Human Resource Development (MHRD), Government of India for the financial support to the project for development of curricula.

We are grateful to the Director, NCERT for his support and guidance. We also acknowledge the contributions of our colleagues at the Technical Support Group of RMSA, MHRD, RMSA Cell at the National Council of Educational Research and Training (NCERT), National Skill Development Agency (NSDA) and National Skill Development Corporation (NSDC) and Electronics Sector Skill Council of Indian (ESSCI) for their academic support and cooperation.

We are grateful to Dipak D. Shudhalwar, Associate Professor (CSE), PSSCIVE, for his earnest effort and contributions in the development of this learning outcome based curriculum. The contributions are dully acknowledged.

The contributions made by Vinay Swarup Mehrotra, Professor and Head, Curriculum Development and Evaluation Centre (CDEC), Vipin Kumar Jain, Associate Professor and Head, Programme Planning and Monitoring Cell (PPMC) and Dipak Shudhalwar, Associate Professor (CSE) and Head, Department of Engineering and Technology, PSSCIVE in development of the curriculum for the employability skills are duly acknowledged.

We are also grateful to the Course Coordinator Dipak D. Shudhalwar, Associate Professor (CSE) and Head, Department of Engineering and Technology, PSSCIVE, for bringing out this curriculum in the final form.

# 1. COURSE OVERVIEW

---

## **COURSE TITLE: Optical Fibre Splicer**

An Optical Fibre Splicer is responsible for ensuring efficient splicing of the optical fibre cables and supports in optical fibre installation and in carrying out fibre testing using OTDR and power meter.

This job requires the individual to work in field set-up and be able to handle pressure situations. He should have basic written and oral communication skills and should be able to apply practical judgement to successfully perform the assigned responsibilities.

**COURSE OUTCOME :** On completion of the course, students should be able to:

- ✓ Apply effective oral and written communication skills to interact with people and customers;
- ✓ Identify the principal components of a computer system;
- ✓ Demonstrate the basic skills of using computer;
- ✓ Demonstrate self-management skills;
- ✓ Demonstrate the ability to provide a self-analysis in context of entrepreneurial skills and abilities;
- ✓ Demonstrate the knowledge of the importance of green skills in meeting the challenges of sustainable development and environment protection;
- ✓ Prepare cable for splicing;
- ✓ Carry out splicing operations;
- ✓ Test effectiveness of the splice through OTDR and power meter tests;
- ✓ Close the activity and document the test results;
- ✓ Co-ordinate trenching, laying, jointing and blowing of cables;
- ✓ Carry out splicing of cables.

**COURSE REQUIREMENTS:** The learner should have the basic reading and writing skills in English and Hindi.

**COURSE LEVEL:** This is a beginner level course meant for class 9 and 10. After completion of this course, the student can go for the course on Optical Fibre Technician in class 11 and 12.

**COURSE DURATION: 400 Hours**

Class 9 : 200 hrs

Class 10 : 200 hrs

## 2. SCHEME OF UNITS AND ASSESSMENT

This course is a planned sequence of instructions consisting of Units meant for developing employability and vocational competencies of students of Class 9 and 10 opting for vocational subject along with general education subjects. The unit-wise distribution of hours and marks for Class 9 is as follows:

<b>CLASS 9</b>			
	<b>Units</b>	<b>No. of Hours for Theory and Practical 200</b>	<b>Max. Marks for Theory and Practical 100</b>
<b>Part A</b>	<b>Employability Skills</b>		
	Unit 1: Communication Skills	20	<b>10</b>
	Unit 2: Self-management Skills	10	
	Unit 3: Basic ICT Skills	20	
	Unit 4: Entrepreneurial Skills	15	
	Unit 5: Green Skills	10	
	<b>Total</b>	<b>75</b>	<b>10</b>
<b>Part B</b>	<b>Vocational Skills</b>		
	Unit 1: Basics of Fiber Optics Communication	20	<b>30</b>
	Unit 2: Optical tools, equipment and spares	20	
	Unit 3: Perform splicing operations	25	
	Unit 4: Testing and Joint closure	15	
	Unit 5: Maintain Health and Safety	15	
	<b>Total</b>	<b>95</b>	<b>30</b>
<b>Part C</b>	<b>Practical Work</b>		
	Practical Examination	6	15
	Written Test	1	10
	Viva Voce	3	10
	<b>Total</b>	<b>10</b>	<b>35</b>
<b>Part D</b>	<b>Project Work/Field Visit</b>		
	Practical File/ Student Portfolio	10	10
	Viva Voce	5	5
	<b>Total</b>	<b>15</b>	<b>15</b>
<b>Part E</b>	<b>Continuous and Comprehensive Evaluation (CCE)</b>	<b>05</b>	<b>10</b>
	<b>Total</b>	<b>200</b>	<b>100</b>

The unit-wise distribution of hours and marks for **Class 10** is as follows:

<b>CLASS 10</b>			
	<b>Units</b>	<b>No. of Hours for Theory and Practical 200</b>	<b>Max. Marks for Theory and Practical 100</b>
<b>Part A</b>	<b>Employability Skills</b>		
	Communication Skills	20	<b>10</b>
	Self-management Skills	10	
	Basic ICT Skills	20	
	Entrepreneurial Skills	15	
	Green Skills	10	
	<b>Total</b>	<b>75</b>	<b>10</b>
<b>Part B</b>	<b>Vocational Skills</b>		
	Unit 1: Route Inspection	15	<b>30</b>
	Unit 2: Arranging Tools, Equipment and Spares	20	
	Unit 3: Cable laying and Installation	30	
	Unit 4: Testing the Installation	20	
	Unit 5: Documentation and Reporting	10	
	<b>Total</b>	<b>95</b>	<b>30</b>
<b>Part C</b>	<b>Practical Work</b>		
	Practical Examination	6	15
	Written Test	1	10
	Viva Voce	3	10
	<b>Total</b>	<b>10</b>	<b>35</b>
<b>Part D</b>	<b>Project Work/Field Visit</b>	<b>10 Hours</b>	
	Practical File/ Student Portfolio	10	10
	Viva Voce	5	5
	<b>Total</b>	<b>15</b>	<b>15</b>
<b>Part E</b>	<b>Continuous and Comprehensive Evaluation (CCE)</b>	<b>05</b>	<b>10</b>
	<b>Total</b>	<b>200</b>	<b>100</b>

### **3. TEACHING/TRAINING ACTIVITIES**

---

The teaching and training activities have to be conducted in classroom, laboratory/workshops and field visits. Students should be taken to field visits for interaction with experts and to expose them to the various tools, equipment, materials, procedures and operations in the workplace.

Special emphasis should be laid on the occupational safety, health and hygiene during the training and field visits.

#### **CLASSROOM ACTIVITIES**

Classroom activities are an integral part of this course and interactive lecture sessions, followed by discussions should be conducted by trained vocational teachers. Vocational teachers should make effective use of a variety of instructional aids, such as audio-video materials, colour slides, charts, diagrams, models, exhibits, hand-outs, online teaching materials, etc. to transmit knowledge and impart training to the students.

#### **PRACTICAL WORK IN LABORATORY/WORKSHOP**

Practical work may include but not limited to hands-on-training, simulated training, role play, case based studies, exercises, etc. Equipment and supplies should be provided to enhance hands-on learning experience of students. Only trained personnel should teach specialized techniques. A training plan that reflects tools, equipment, materials, skills and activities to be performed by the students should be submitted by the vocational teacher to the Head of the Institution.

#### **FIELD VISITS/ EDUCATIONAL TOUR**

In field visits, children will go outside the classroom to obtain specific information from experts or to make observations of the activities. A checklist of observations to be made by the students during the field visits should be developed by the Vocational Teachers for systematic collection of information by the students on the various aspects. Principals and Teachers should identify the different opportunities for field visits within a short distance from the school and make necessary arrangements for the visits. At least three field visits should be conducted in a year.

### **4. ASSESSMENT AND CERTIFICATION**

---

**U**pon successful completion of the course by the candidate, the Central/ State Examination Board for Secondary Education and the respective Sector Skill Council will certify the competency.

The National Skills Qualifications Framework (NSQF) is based on outcomes referenced to the National Occupation Standards (NOSs), rather than inputs. The NSQF level descriptors, which are the learning outcomes for each level, include the process, professional knowledge, professional skills, core skills and responsibility. The assessment is to be undertaken to verify that individuals have the knowledge and skills needed to perform a particular job and that the learning programme undertaken has delivered education at a given standard. It should be closely linked to certification so that the individual and the employer could come to know the competencies acquired through the vocational subject or course. The assessment should be reliable, valid, flexible, convenient, cost effective and above all it should be fair and transparent. Standardized assessment tools should be used for assessment of knowledge of students. Necessary arrangements should be made for using technology in assessment of students.

## KNOWLEDGE ASSESSMENT (THEORY)

**Knowledge Assessment** should include two components: one comprising of internal assessment and second an external examination, including theory examination to be conducted by the Board. The assessment tools shall contain components for testing the knowledge and application of knowledge. The knowledge test can be objective paper based test or short structured questions based on the content of the curriculum.

### WRITTEN TEST

It allows candidates to demonstrate that they have the knowledge and understanding of a given topic. Theory question paper for the vocational subject should be prepared by the subject experts comprising group of experts of academicians, experts from existing vocational subject experts/teachers, and subject experts from university/colleges or industry. The respective Sector Skill Council should be consulted by the Central/State Board for preparing the panel of experts for question paper setting and conducting the examinations.

The blue print for the question paper may be as follows:

**Duration: 3 hrs**

**Max. Mark: 30**

Sn.	Typology of Question	Very Short Answer Q. (1 mark)	Short Answer Q (2 Marks)	Long Answer Questions (3 Marks)	Marks
1.	Remembering - (Knowledge based simple recall questions, to know specific facts, terms, concepts, principles, or theories; identify, define or recite, information)	2	1	2	10
2.	Understanding - (Comprehension - to be familiar with meaning and to understand conceptually, interpret, compare, contrast, explain, paraphrase, or interpret information)	1	2	2	11
3.	Application - (Use abstract information in concrete situation, to apply knowledge to new situations: Use given content to interpret a situation, provide an example, or solve a problem)	0	1	1	05
4.	High Order Thinking Skills - (Analysis & Synthesis - Classify, compare, contrast, or differentiate between different pieces of information; Organize and/ or integrate unique pieces of information from a variety of sources)	0	1	0	02
5.	Evaluation - (Appraise, judge, and/or justify the value or worth of a decision or outcome, or to predict outcomes based on values)	0	1	0	02
	<b>Total</b>	<b>3x1=3</b>	<b>6x2=12</b>	<b>5x3=15</b>	<b>30 (14 Ques)</b>

## SKILL ASSESSMENT (PRACTICAL)

Assessment of skills by the students should be done by the assessors/examiners on the basis of practical demonstration of skills by the candidate, using a competency checklist. The competency checklist should be developed as per the National Occupation Standards (NOSs) given in the Qualification Pack for the Job Role to bring about necessary consistency in the quality of assessment across different sectors and Institutions. The student has to demonstrate competency against the performance criteria defined in the National Occupation Standards and the assessment will indicate that they are 'competent', or are 'not yet competent'. The assessors assessing the skills of the students should possess a current experience in the industry and should have undergone an effective training in assessment principles and practices. The Sector Skill Councils should ensure that the assessors are provided with the training on the assessment of competencies.

Practical examination allows candidates to demonstrate that they have the knowledge and understanding of performing a task. This will include hands-on practical exam and viva voce. For practical, there should be a team of two evaluators - the subject teacher and the expert from the relevant industry certified by the Board or concerned Sector Skill Council. The same team of examiners will conduct the viva voce.

**Project Work** (individual or group project) is a great way to assess the practical skills on a certain time period or timeline. Project work should be given on the basis of the capability of the individual to perform the tasks or activities involved in the project. Projects should be discussed in the class and the teacher should periodically monitor the progress of the project and provide feedback for improvement and innovation. Field visits should be organised as part of the project work. Field visits can be followed by a small-group work/project work. When the class returns from the field visit, each group might be asked to use the information that they have gathered to prepare presentations or reports of their observations. Project work should be assessed on the basis of practical file or student portfolio.

**Student Portfolio** is a compilation of documents that supports the candidate's claim of competence. Documents may include reports, articles, photos of products prepared by students in relation to the unit of competency.

**Viva voce** allows candidates to demonstrate communication skills and content knowledge. Audio or video recording can be done at the time of viva voce. The number of external examiners would be decided as per the existing norms of the Board and these norms should be suitably adopted/adapted as per the specific requirements of the vocational subject. Viva voce should also be conducted to obtain feedback on the student's experiences and learning during the project work/field visits.

## CONTINUOUS AND COMPREHENSIVE EVALUATION

Continuous and Comprehensive Evaluation (CCE) refers to a system of school-based evaluation of students that covers all aspects of student's development. In this scheme, the term 'continuous' is meant to emphasize that evaluation of identified aspects of students 'growth and development' is a continuous process rather than an event, built into the total teaching-learning process and spread over the entire span of academic session. The second term 'comprehensive' means that the scheme attempts to cover both the scholastic and the co-scholastic aspects of students' growth and development. For details, the CCE manual of Central Board of Secondary Education (CBSE) or the guidelines issued by the State Boards on the procedure for CCE should be followed by the Institutions.

## 5. UNIT CONTENTS

### CLASS 9

#### Part A: Employability Skills

S.No.	Units	Duration in Hours
1.	Unit 1: Communication Skills - I	20
2.	Unit 2: Self-management Skills - I	10
3.	Unit 3: Basic ICT Skills - I	20

			<b>Total Duration in Hours</b>	<b>20</b>

**Unit 4: Entrepreneurial Skills - I**

<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (06 Hours)</b>	<b>Practical (09 Hours)</b>	<b>15 Hrs</b>
1.	Identify various types of business activities	<ul style="list-style-type: none"> <li>Types of businesses - service, manufacturing, hybrid.</li> <li>Types of businesses found in our community Business activities around us.</li> </ul>	<ul style="list-style-type: none"> <li>Prepare posters of business activities found in cities/ villages, using pictures.</li> <li>Discuss the various types of activities, generally adopted by small businesses in a local community.</li> <li>Best out of waste.</li> <li>Costing of the product made out of waste.</li> </ul>	09

			<ul style="list-style-type: none"> <li>Selling of items made from waster materials.</li> <li>Prepare list of businesses that provides goods and services in exchange for money.</li> </ul>	
2.	Demonstrate the knowledge of distinguishing characteristics of entrepreneurship	<ul style="list-style-type: none"> <li>Meaning of entrepreneurship development.</li> <li>Distinguishing characteristics of entrepreneurship.</li> <li>Role and rewards of entrepreneurship.</li> </ul>	<ul style="list-style-type: none"> <li>Prepare charts showing advantages of entrepreneurship over wages.</li> <li>Group discussions on role and features of entrepreneurship.</li> <li>Lectures/presentations by entrepreneurs on their experiences and success stories.</li> <li>Identify core skills of successful entrepreneur.</li> </ul>	06
			<b>Total Duration in Hours</b>	<b>15</b>

**Unit 5: Green Skills - I**

<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (03 Hours)</b>	<b>Practical (07 Hours)</b>	<b>10 Hrs</b>
1.	Demonstrate the knowledge of the factors influencing natural resource conservation.	<ul style="list-style-type: none"> <li>Introduction to environment.</li> <li>Relationship between society and environment, ecosystem and factors causing imbalance.</li> <li>Natural resource conservation.</li> <li>Environment protection and conservation.</li> </ul>	<ul style="list-style-type: none"> <li>Group discussion on hazards of deteriorating environment.</li> <li>Prepare posters showing environment conservation.</li> <li>Discussion on various factors that influence our environment.</li> </ul>	05
2.	Describe the importance of green economy and green skills.	<ul style="list-style-type: none"> <li>Definition of green economy</li> <li>Importance of green economy</li> </ul>	<ul style="list-style-type: none"> <li>Discussion on the benefits of green skills and importance of green economy.</li> <li>Prepare a Poster showing the importance of green economy with the help of newspaper/ magazine cuttings.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>10</b>

## Part B: Vocational Skills

Sn.	Units	Duration in Hours
1.	Unit 1: Basics of Fiber Optics Communication	20
2.	Unit 2: Optical tools, equipment and spares	20
3.	Unit 3: Perform splicing operations	25
4.	Unit 4: Testing and Joint closure	15
5.	Unit 5: Maintain Health and Safety	15
	<b>Total Duration</b>	<b>95</b>

Unit 1: Basics of Fiber Optics Communication				
Sn	Learning Outcome	Theory (10 Hours)	Practical (10 Hours)	20 Hrs
1.	Explain the data communication	<ul style="list-style-type: none"> <li>The communication process</li> <li>Concept of data communication</li> <li>Characteristics of data communication</li> <li>Components of data communication</li> <li>Modes of communication</li> </ul>	Demonstrate the communication process. <ul style="list-style-type: none"> <li>Identify and list the various forms of data.</li> <li>Observe the communication speed for various forms of data.</li> </ul>	05
2.	Compare the various transmission media	<ul style="list-style-type: none"> <li>Transmission media</li> <li>Types of transmission media</li> <li>Wired media</li> <li>Wireless media</li> <li>Speed of various media</li> <li>Factors affecting speed of data communication</li> </ul>	<ul style="list-style-type: none"> <li>Observe the speed of communication in various transmission media.</li> </ul>	05
3.	Explain the fibre optic communication	<ul style="list-style-type: none"> <li>Basics of fibre optic communication</li> <li>Structure of fibre</li> <li>Fibre optic communication</li> <li>Principle of fibre optic communication</li> <li>Light Theory</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the principle of fibre optic communication.</li> </ul>	05
4.	Explain the optical fiber characteristics	<ul style="list-style-type: none"> <li>Optical fiber characteristics - refraction, polarization, attenuation, dispersion,</li> <li>Bands in optical fibre and their usability, loss characteristics,</li> <li>Signal strength and quality KPIs - design values and margins.</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the optical fibre characteristics</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>20</b>

<b>Unit 2: Optical tools, equipment and spares</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (10 Hours)</b>	<b>Practical (10 Hours)</b>	<b>20 Hrs</b>
1.	Operate fusion splicing machine	<ul style="list-style-type: none"> <li>Fusion splicing machine: manual, automatic or handheld</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the working of fusion splicing machine: manual, automatic or handheld</li> </ul>	04
2.	Utilize appropriate optical splicing equipment	<ul style="list-style-type: none"> <li>Various optical equipment - cleaver, mechanical and fusion splicing kit, protection sleeves, fiber stripper, fiber reinforced plaster during splicing and jointing,</li> <li>Functionality of optical equipment.</li> </ul>	<ul style="list-style-type: none"> <li>Identify and list the various optical tools, equipment and spares,</li> <li>Demonstrate the functionality of optical equipment.</li> </ul>	04
3.	Operate splice sleeve heaters	<ul style="list-style-type: none"> <li>Splice sleeve heaters</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to use splice sleeve heaters (within the machine and external to the splicing machine)</li> </ul>	04
4.	Operate OTDR and Power meter	<ul style="list-style-type: none"> <li>Test equipment - like OTDR and Power meter,</li> <li>optimal values of OTDR, Power meter and light meter test results</li> </ul>	<ul style="list-style-type: none"> <li>Identify the various parts of OTDR and Power meter,</li> <li>Demonstrate the functionality of OTDR and Power meter</li> </ul>	04
5.	Utilize fiber spool	<ul style="list-style-type: none"> <li>Fiber spool</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to use fiber spool where appropriate while carrying out OTDR tests</li> </ul>	04
			<b>Total Duration in Hours</b>	<b>20</b>

<b>Unit 3: Perform splicing operations</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (10 Hours)</b>	<b>Practical (15 Hours)</b>	<b>25 Hrs</b>
1.	Explain the process of splicing	<ul style="list-style-type: none"> <li>General splicing process,</li> <li>Steps in splicing,</li> <li>Materials required for splicing.</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the general process of splicing by using the normal cable.</li> </ul>	05
2.	Prepare cable for splicing	<ul style="list-style-type: none"> <li>Cable specifications,</li> <li>Cable damage and signal degradation,</li> <li>Safe industry practice to avoid sheath and damage,</li> <li>Color coding of fiber, and sequence</li> </ul>	<ul style="list-style-type: none"> <li>Identify the signs of sheath damage of cable,</li> <li>Perform splice in both indoor and outdoor environment</li> <li>utilize appropriate fiber like single mode and multi mode optical fibre based on specific requirements</li> <li>identify the appropriate fibers to be joined based on</li> </ul>	05

			color coding, and sequence	
3.	Carry out both fusion and mechanical splicing	<ul style="list-style-type: none"> <li>Fusion and mechanical splicing process</li> <li>Types of loss - reflectance loss, optical return loss, insertion loss.</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the splicing ensuring minimum reflectance loss, optical return loss, insertion loss</li> </ul>	05
4.	Install and operate Installation Termination joint boxes (TJBs)	<ul style="list-style-type: none"> <li>Installation and operation of Installation Termination joint boxes (TJBs)</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to Install and operate Installation Termination joint boxes (TJBs)</li> </ul>	05
5.	Install and operate the Fiber Distribution Frames (FDFs)	<ul style="list-style-type: none"> <li>Installation and operation of Fiber Distribution Frames (FDFs) with different types of 0dB connectors.</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to Install and operate the Fiber Distribution Frames (FDFs) with different types of 0dB connectors.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>25</b>

**Unit 4: Testing and Joint closure**

Sn	Learning Outcome	Theory (05 Hours)	Practical (10 Hours)	15 Hrs
1.	Test the fiber joint with OTDR	<ul style="list-style-type: none"> <li>Standard process of OTDR test,</li> <li>Standard process of Power meter tests</li> <li>Optical losses - reflectance, return and insertion and its defined specifications/ limits,</li> <li>Sealing of Joint closure</li> <li>Heat shrinking/ multi diameter seals/ mechanical seals</li> <li>FRP - Fiber reinforced plastic</li> </ul>	<ul style="list-style-type: none"> <li>Perform OTDR test as per standard process and summarize OTDR reports for records and review,</li> <li>Perform Power meter tests as per standard process and identify instances of cross-fibers.</li> <li>Record the losses,</li> <li>Ensure sealing of Joint closure through heat shrinking/ multi diameter seals/ mechanical seals as appropriate</li> <li>Use FRP to strengthen the joint</li> </ul>	05
2.	Test the fiber using power source and power meter tests	<ul style="list-style-type: none"> <li>Testing process of fiber using power source and power meter</li> </ul>	<ul style="list-style-type: none"> <li>Test the fiber at both ends for instances of cross fiber using power source and power meter tests and ensure their elimination</li> </ul>	05
3.	Perform Joint closure	<ul style="list-style-type: none"> <li>Joint</li> <li>Chamber</li> <li>Indicator</li> <li>Joint color</li> </ul>	<ul style="list-style-type: none"> <li>Place joint in the chamber</li> <li>Coiled spare cable (loop) appropriately and place it inside the joint</li> <li>Fill sand in the chamber</li> <li>Plant the Joint indicator behind chamber location</li> <li>Paint the indicator with yellow colour for joint.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>15</b>

<b>Unit 5: Maintain Health and Safety</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (05 Hours)</b>	<b>Practical (10 Hours)</b>	<b>15 Hrs</b>
1.	Dispose of the cut fibers, sleeves and cable pieces	<ul style="list-style-type: none"> <li>Cut fibers, sleeves and cable pieces</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate the disposal of the cut fibers, sleeves and cable pieces</li> </ul>	05
2.	Follow company's norms and compliance	<ul style="list-style-type: none"> <li>Site risk control, OHS, environmental</li> <li>Quality requirements as per company's norms</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to follow company's norms and compliance with site risk control</li> </ul>	05
3.	Use appropriate personal protection equipment	<ul style="list-style-type: none"> <li>Personal protection equipment - helmets, knee pads, safety boots, safety glasses and trench guards,</li> <li>Environmental conditions and hazards - Earth Potential Rise (EPR),</li> <li>Guidelines for escalation of safety incidents</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to use personal protection equipment like helmets, knee pads, safety boots, safety glasses and trench guards,</li> <li>Demonstrate to consider environmental conditions and hazards like EPR while carrying out the work</li> <li>Demonstrate to follow guidelines for escalation of safety incidents.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>15</b>

**CLASS 10****Part A: Employability Skills**

S. No.	Units	Duration in Hours
1.	Unit 1: Communication Skills	20
2.	Unit 2: Self-management Skills	10
3.	Unit 3: Basic ICT Skills	20
4.	Unit 4: Entrepreneurial Skills	15
5.	Unit 5: Green Skills	10
<b>Total</b>		<b>75</b>

<b>Unit 1: Communication Skills - II</b>				
Sn	Learning Outcome	Theory (12 Hours)	Practical (08 Hours)	20 Hrs
1.	Demonstrate knowledge of various methods of communication.	<ul style="list-style-type: none"> <li>• Methods of communication</li> <li>• Verbal.</li> <li>• Non-verbal.</li> <li>• Visual.</li> </ul>	<ul style="list-style-type: none"> <li>• Writing pros and cons of written, verbal and non-verbal communication</li> <li>• Listing do's and don'ts for avoiding common body language mistakes</li> </ul>	04
2.	Provide descriptive and specific feedback.	<ul style="list-style-type: none"> <li>• Communication cycle and importance of feedback.</li> <li>• Meaning and importance of feedback.</li> <li>• Descriptive feedback - written comments or conversations.</li> <li>• Specific and non-specific feedback.</li> </ul>	<ul style="list-style-type: none"> <li>• Constructing sentences for providing descriptive and specific feedback.</li> </ul>	04
3.	Apply measures to overcome barriers in communication.	<ul style="list-style-type: none"> <li>• Barriers to effective communication - types and factors.</li> <li>• Measures to overcome barriers in effective Communication.</li> </ul>	<ul style="list-style-type: none"> <li>• Enlisting barriers to effective communication.</li> <li>• Applying measures to overcome barriers in communication.</li> </ul>	04
4.	Apply principles of communication.	<ul style="list-style-type: none"> <li>• Principles of effective communication.</li> <li>• 7 Cs of effective communication.</li> </ul>	<ul style="list-style-type: none"> <li>• Constructing sentences that convey all facts required by the receiver.</li> <li>• Expressing in a manner that shows respect to the receiver of the message</li> <li>• Exercises and games on applying 7Cs of effective communication.</li> </ul>	04
5.	Demonstrate basic writing skills.	<ul style="list-style-type: none"> <li>• Writing skills to the following:</li> <li>• Sentence</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstration and practice of writing sentences and paragraphs on topics</li> </ul>	04

		<ul style="list-style-type: none"> <li>• Phrase</li> <li>• Kinds of Sentences</li> <li>• Parts of Sentence</li> <li>• Parts of Speech</li> <li>• Articles</li> <li>• Construction of paragraph.</li> </ul>	related to the subject.	
			<b>Total Duration in Hours</b>	<b>20</b>

**Unit 2: Self-management Skills - II**

<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (05 Hours)</b>	<b>Practical (05 Hours)</b>	<b>10 Hr s</b>
1.	Apply stress management techniques	<ul style="list-style-type: none"> <li>• Meaning and importance of stress management</li> <li>• Stress management techniques – physical exercise, yoga, meditation</li> <li>• Enjoying, going to vacations and holidays with family and friends</li> <li>• Taking nature walks</li> </ul>	<ul style="list-style-type: none"> <li>• Exercises on stress management techniques – yoga, meditation, physical exercises.</li> <li>• Preparing a write-up on an essay on experiences during a holiday trip.</li> </ul>	04
2.	Demonstrate the ability to work independently	<ul style="list-style-type: none"> <li>• Importance of the ability to work independently.</li> <li>• Describe the types of self-awareness.</li> <li>• Describe the meaning of self-motivation and self-regulation.</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstration on working independently goals.</li> <li>• Planning of an activity Executing tasks in a specific period, with no help or directives.</li> <li>• Demonstration on the qualities required for working independently.</li> </ul>	06
			<b>Total Duration in Hours</b>	<b>10</b>

**Unit 3: Basic ICT Skills - II**

<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (10 Hours)</b>	<b>Practical (10 Hours)</b>	<b>20 Hr s</b>
1.	Prepare documentation using Word Processing Application	<ul style="list-style-type: none"> <li>• Introduction to word processing.</li> <li>• Software packages for word processing.</li> <li>• Opening and exiting the word processor.</li> <li>• Creating a document.</li> <li>• Saving document.</li> <li>• Text editing.</li> <li>• Word wrap and alignment.</li> <li>• Font size, type and face.</li> <li>• Header and Footer.</li> <li>• Auto Correct.</li> <li>• Numbering and Bullet.</li> <li>• Creating Table.</li> </ul>	<ul style="list-style-type: none"> <li>• List the features of word processing.</li> <li>• List the software packages for word processing.</li> <li>• Open and exit the word processor.</li> <li>• Create a document.</li> <li>• Edit the text.</li> <li>• Wrap and align the text.</li> <li>• Change the font type, size, and face.</li> <li>• Insert Header and Footer.</li> <li>• Use Autocorrect option.</li> <li>• Assign numbering and bullets to list items.</li> </ul>	10

		<ul style="list-style-type: none"> <li>• Password protection.</li> <li>• Printing document.</li> <li>• Find and Replace.</li> <li>• Page numbering.</li> <li>• Saving a document in various formats.</li> </ul>	<ul style="list-style-type: none"> <li>• Create Table.</li> <li>• Save the document.</li> <li>• Protect the document with password.</li> <li>• Print the document.</li> <li>• Use Find and Replace.</li> <li>• Give page numbering.</li> <li>• Save the document in various formats.</li> </ul>	
2.	Perform Tabulation using Spreadsheet Application	<ul style="list-style-type: none"> <li>• Introduction to spreadsheet application.</li> <li>• Various spreadsheet applications.</li> <li>• Creating a new worksheet.</li> <li>• Opening workbook and entering data.</li> <li>• Resizing fonts and styles.</li> <li>• Copying and moving.</li> <li>• Filter and sorting.</li> <li>• Formulas and functions.</li> <li>• Password protection.</li> <li>• Printing a spreadsheet.</li> <li>• Saving a spreadsheet in various formats.</li> </ul>	<ul style="list-style-type: none"> <li>• Introduce with the spreadsheet application.</li> <li>• List the spreadsheet applications.</li> <li>• Create a new worksheet.</li> <li>• Open the workbook and enter text.</li> <li>• Resize fonts and styles.</li> <li>• Copy and move the cell data.</li> <li>• Sort and Filter the data.</li> <li>• Apply elementary formulas and functions.</li> <li>• Protect the spreadsheet with password.</li> <li>• Print a spreadsheet.</li> <li>• Save the spreadsheet in various formats.</li> </ul>	10
3.	Prepare Presentation using Presentation Application	<ul style="list-style-type: none"> <li>• Introduction to presentation software .</li> <li>• Software packages for presentation.</li> <li>• Creating a new presentation.</li> <li>• Entering and editing text.</li> <li>• Adding a slide.</li> <li>• Deleting a slide.</li> <li>• Formatting text.</li> <li>• Inserting clipart &amp; images.</li> <li>• Slide layout.</li> <li>• Slide transition and custom animation.</li> <li>• Saving a presentation.</li> <li>• Printing a presentation. document.</li> </ul>	<ul style="list-style-type: none"> <li>• Explain the features of presentation.</li> <li>• List the software packages for presentation.</li> <li>• Create a new presentation.</li> <li>• Add a slide to presentation.</li> <li>• Delete a slide.</li> <li>• Enter and edit text.</li> <li>• Format text.</li> <li>• Insert clipart &amp; images.</li> <li>• Slide layout.</li> <li>• Save a presentation.</li> <li>• Print a presentation. document.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>25</b>

#### Unit 4: Entrepreneurial Skills - II

Sn	Learning Outcome	Theory (06 Hours)	Practical (09 Hours)	15 Hrs
1.	List the characteristics of successful entrepreneur	<ul style="list-style-type: none"> <li>• Entrepreneurship and society.</li> <li>• Qualities and functions of an entrepreneur.</li> </ul>	<ul style="list-style-type: none"> <li>• Writing a note on entrepreneurship as career option.</li> <li>• Collecting success stories</li> </ul>	15

		<ul style="list-style-type: none"> <li>• Role and importance of an entrepreneur.</li> <li>• Myth about entrepreneurship.</li> <li>• Entrepreneurship as a career option.</li> </ul>	<ul style="list-style-type: none"> <li>• of first generation and local entrepreneurs.</li> <li>• Listing the entrepreneurial qualities – analysis of strength and weaknesses.</li> <li>• Group discussion of self-qualities that students feel are needed to become successful entrepreneur.</li> <li>• Collect information and related data for a business.</li> <li>• Make a plan in team for setting up a business.</li> </ul>	
			<b>Total Duration in Hours</b>	<b>15</b>

<b>Unit 5: Green Skills - II</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (07 Hours)</b>	<b>Practical (03 Hours)</b>	<b>10 Hrs</b>
1.	Demonstrate the knowledge of importance, problems and solutions related to sustainable development	<ul style="list-style-type: none"> <li>• Definition of sustainable development.</li> <li>• Importance of sustainable development.</li> <li>• Problems related to sustainable development.</li> </ul>	<ul style="list-style-type: none"> <li>• Identify the problem related to sustainable development in the community.</li> <li>• Group discussion on the importance of respecting and conserving indigenous knowledge and cultural heritage.</li> <li>• Discussion on the responsibilities and benefits of environmental citizenship, including the conservation and protection of environmental values.</li> <li>• Preparing models on rain water harvesting, drip / sprinkler irrigation, vermin-compost, solar energy, solar cooker, etc.</li> </ul>	10
			<b>Total Duration in Hours</b>	<b>10</b>

## Part B: Vocational Skills

<b>Sn</b>	<b>Units</b>	<b>Duration in Hours</b>
1.	Unit 1: Route Inspection	15
2.	Unit 2: Arranging Tools, Equipment and Spares	20
3.	Unit 3: Cable laying and Installation	30
4.	Unit 4: Testing the Installation	20
5.	Unit 5: Documentation and Reporting	10
	<b>Total Duration</b>	<b>95</b>

<b>Unit 1: Route Inspection</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (0 Hours)</b>	<b>Practical (10 Hours)</b>	<b>20 Hrs</b>
1.	Read and interpret OFC route plan	<ul style="list-style-type: none"> <li>OFC route plan,</li> <li>Route diagrams and other numerical data,</li> <li>Understanding OFC route</li> </ul>	<ul style="list-style-type: none"> <li>Draw the route plan for various site conditions,</li> <li>Draw the route diagram with numerical data</li> </ul>	05
2.	Verify the proposed route for cable laying	<ul style="list-style-type: none"> <li>Cable laying process in the various site conditions</li> </ul>	<ul style="list-style-type: none"> <li>Draw the cable laying plan for the proposed site</li> </ul>	05
3.	Inspect the site for safe and secure cable installation	<ul style="list-style-type: none"> <li>Safety and security of site,</li> <li>Various parameters to inspect the site</li> </ul>	<ul style="list-style-type: none"> <li>Identify the various parameters to ensure safety and security of site for cable laying.</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>15</b>

<b>Unit 2: Arranging Tools, Equipment and Spares</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (10 Hours)</b>	<b>Practical (10 Hours)</b>	<b>20 Hrs</b>
1.	Identify the tools and equipment for cable laying	<ul style="list-style-type: none"> <li>Tools and equipment for cable laying,</li> <li>Specifications of various tools and equipment.</li> </ul>	<ul style="list-style-type: none"> <li>Make a list of various tools and equipment for cable laying process,</li> <li>Identify the various tools and equipment used for cable laying process.</li> </ul>	10
2.	Use tools and	<ul style="list-style-type: none"> <li>Procedure to use various tools and equipment for cable laying process.</li> <li>Safety and care to handle various tools and equipment.</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate to use various tools and equipment for cable laying process.</li> <li>Demonstrate to handle tools and equipment with safety and care.</li> </ul>	10
			<b>Total Duration in Hours</b>	<b>20</b>

<b>Unit 3: Cable laying and Installation</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (10 Hours)</b>	<b>Practical (20 Hours)</b>	<b>30 Hrs</b>
1.	Carry out trenching	<ul style="list-style-type: none"> <li>Cable drum,</li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate cable testing</li> </ul>	05

		<ul style="list-style-type: none"> <li>• optical continuity,</li> <li>• Trenching process</li> <li>• Dispensers and its use.</li> </ul>	<ul style="list-style-type: none"> <li>• on drum for optical continuity</li> <li>• Demonstrate to carry out trenching as per the route plan requirements and site,</li> <li>• Use specially designed dispensers to place the ducts in the trench.</li> </ul>	
2.	Carry out cable laying	<ul style="list-style-type: none"> <li>• Cable laying standards - placing pipe/ ducts at lower appropriate depths, ducts free from twists, collapsed portions</li> <li>• Cable laying process</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate the cable laying as per the standards and procedure.</li> <li>• Demonstrate the cable laying in different site conditions.</li> </ul>	05
3.	Joint and blow cable	<ul style="list-style-type: none"> <li>• Cable jointing and blowing,</li> <li>• Cable blowing machines,</li> <li>• Cable blowing standard process,</li> <li>• End plugs to close the ends of ducts,</li> <li>• Cleaning the duct.</li> </ul>	<ul style="list-style-type: none"> <li>• Joint the duct airtight,</li> <li>• Demonstrate blowing using cable blowing machines,</li> <li>• Demonstrate the cable blowing/ jetting using rodder as per standard ,</li> <li>• Closing the ends of ducts with End Plugs,</li> <li>• Clean the duct to remove sand, dust</li> </ul>	05
4.	Prepare the cable for installation	<ul style="list-style-type: none"> <li>• Cable preparation as per the length of duct,</li> <li>• Colour and/ or sequence matching criteria for jointing,</li> <li>• Standard fusion/ mechanical splicing mechanisms,</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate to prepare the cable as per the length of duct,</li> <li>• Demonstrate the jointing based on colour and/ or sequence matching in case of cable shortage,</li> <li>• Demonstrate the jointing/ splicing as per the standard fusion/ mechanical splicing mechanisms</li> </ul>	05
5.	Install the cable	<ul style="list-style-type: none"> <li>• Standard cable installation process,</li> <li>• Protection material such as GI pipes, RCC pipes, RCC half-cut pipes etc.</li> <li>• Pushfit couplers as duct joints</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate the cable installation for different site conditions,</li> <li>• Demonstrate to use protection material such as GI pipes, RCC pipes, RCC half-cut pipes etc.,</li> <li>• Demonstrate to use Pushfit couplers as duct joints</li> </ul>	05
			<b>Total Duration in Hours</b>	<b>30</b>

<b>Unit 4: Testing the effectiveness of Installation</b>				
<b>Sn</b>	<b>Learning Outcome</b>	<b>Theory (20 Hours)</b>	<b>Practical (20 Hours)</b>	<b>20 Hrs</b>
1.	Check the route and joints	<ul style="list-style-type: none"> <li>Color standards to be used for the route indicators and joint indicators</li> </ul>	<ul style="list-style-type: none"> <li>Check the route indicators and joint indicators as per standards</li> </ul>	04
2.	Check the splices	<ul style="list-style-type: none"> <li>Quality assurance/ AT standards of splicing.</li> </ul>	<ul style="list-style-type: none"> <li>Check the splices are within the quality assurance/ AT standards</li> </ul>	04

## 6. ORGANISATION OF FIELD VISITS

---

In a year, at least 3 field visits/educational tours should be organised for the students to expose them to the activities in the workplace.

Visit the site of installation of OFC and observe the following: Location, Site, Tools and Equipment, Raw Materials, Space parts, Workers behavior. During the visit, students should obtain the following information from the owner or the supervisor of the OFC site:

1. Types of Optical Fibre Cable
2. Installation premises
3. Tools and equipment used
4. Cable laying process
5. Safety precautions
6. Specifications and cost of tools and equipment
7. Total expenditure of the project
8. Manpower engaged
9. Wages of workers
10. Qualifications and skills of workers
11. Any other information

## 7. LIST OF EQUIPMENT AND MATERIALS

---

The list given below is suggestive and an exhaustive list should be prepared by the vocational teacher. Only basic tools, equipment and accessories should be procured by the Institution so that the routine tasks can be performed by the students regularly for practice and acquiring adequate practical experience.

1. Pliers
2. Screwdrivers and nut drivers
3. Wire strippers
4. Fishing tools
5. Voltmeter
6. Ammeter
7. Labelling machines
8. Power drills and drivers
9. Hammer/drills
10. Circuit Testers
11. Knife
12. Electrical Tape
13. Duct Tape
14. A Tool Pouch
15. Ladders and Step Stools
16. Allen Wrench Set (Hex Set)
17. Wire Crimpers
18. Non-contact Voltage Detector
19. Tester
20. OTDR
21. Power Meter

## 8. TEACHER'S/TRAINER'S QUALIFICATION

Qualification and other requirements for appointment of vocational teachers/trainers on contractual basis should be decided by the State/UT. The suggestive qualifications and minimum competencies for the vocational teacher should be as follows:

S. No.	Qualification	Minimum Competencies	Age Limit
1	Diploma in Electronics/ Electrical / Communication Engineering in with a Certificate or Diploma course in Optical Fibre Technology <b>OR</b> Bachelor of Engineering in Electronics/ Communication.	The candidate should have a minimum of 3 year of work experience in the same job role. S/He should be able to communicate in English and local language. S/He should have knowledge of equipment, tools, material, Safety, Health & Hygiene.	18-37 years (as on Jan. 01 (year))  Age relaxation to be provided as per Govt. rules

Vocational Teachers/Trainers form the backbone of Vocational Education being imparted as an integral part of Rashtriya Madhyamik Shiksha *Abhiyan* (RMSA). They are directly involved in teaching of vocational subjects and also serve as a link between the industry and the schools for arranging industry visits, On-the-Job Training (OJT) and placement.

These guidelines have been prepared with an aim to help and guide the States in engaging quality Vocational Teachers/Trainers in the schools. Various parameters that need to be looked into while engaging the Vocational Teachers/Trainers are mode and procedure of selection of Vocational Teachers/Trainers, Educational Qualifications, Industry Experience, and Certification/ Accreditation.

The State may engage Vocational Teachers/Trainers in schools approved under the component of Vocationalisation of Secondary and Higher Secondary Education under RMSA in following ways:

1. Directly as per the prescribed qualifications and industry experience suggested by the PSS Central Institute of Vocational Education(PSSCIVE), NCERT or the respective Sector Skill Council(SSC). **OR**
2. Through accredited Vocational Training Providers accredited under the National Quality Assurance Framework (NQAF\*) approved by the National Skill Qualification Committee on 21.07.2016. If the State is engaging Vocational Teachers/Trainers through the Vocational Training Provider (VTP), it should ensure that VTP should have been accredited at NQAF Level 2 or higher.

\* *The National Quality Assurance Framework (NQAF) provides the benchmarks or quality criteria which the different organisations involved in education and training must meet in order to be accredited by competent bodies to provide government-funded education and training/skills activities. This is applicable to all organizations offering NSQF-compliant qualifications.*

The educational qualifications required for being a Vocational Teacher/Trainer for a particular job role are clearly mentioned in the curriculum for the particular NSQF compliant job role. The State should ensure that teachers / trainers deployed in the schools have relevant technical competencies for the NSQF qualification being delivered. The Vocational Teachers/Trainers preferably should be certified by the concerned Sector Skill Council for the particular

Qualification Pack/Job role which he will be teaching. Copies of relevant certificates and/or record of experience of the teacher/trainer in the industry should be kept as record.

To ensure the quality of the Vocational Teachers/Trainers, the State should ensure that a standardized procedure for selection of Vocational Teachers/Trainers is followed. The selection procedure should consist of the following:

- (i) Written test for the technical/domain specific knowledge related to the sector;
- (ii) Interview for assessing the knowledge, interests and aptitude of trainer through a panel of experts from the field and state representatives; and
- (iii) Practical test/mock test in classroom/workshop/laboratory.

In case of appointment through VTPs, the selection may be done based on the above procedure by a committee having representatives of both the State Government and the VTP.

The State should ensure that the Vocational Teachers/ Trainers who are recruited should undergo induction training of 20 days for understanding the scheme, NSQF framework and Vocational Pedagogy before being deployed in the schools.

The State should ensure that the existing trainers undergo in-service training of 5 days every year to make them aware of the relevant and new techniques/approaches in their sector and understand the latest trends and policy reforms in vocational education.

The Head Master/Principal of the school where the scheme is being implemented should facilitate and ensure that the Vocational Teachers/Trainers:

- Prepare session plans and deliver sessions which have a clear and relevant purpose and which engage the students;
- Deliver education and training activities to students, based on the curriculum to achieve the learning outcomes;
- Make effective use of learning aids and ICT tools during the classroom sessions;
- Engage students in learning activities, which include a mix of different methodologies, such as project based work, team work, practical and simulation based learning experiences;
- Work with the institution's management to organise skill demonstrations, site visits, on-job trainings, and presentations for students in cooperation with industry, enterprises and other workplaces;
- Identify the weaknesses of students and assist them in up-gradation of competency;
- Cater to different learning styles and level of ability of students;
- Assess the learning needs and abilities, when working with students with different abilities
- Identify any additional support the student may need and help to make special arrangements for that support;
- Provide placement assistance

Assessment and evaluation of Vocational Teachers/Trainers is very critical for making them aware of their performance and for suggesting corrective actions. The States/UTs should ensure that the performance of the Vocational Teachers/Trainers is appraised annually. Performance based appraisal in relation to certain pre-established criteria and objectives should be done periodically to ensure the quality of the Vocational Teachers/Trainers. Following parameters may be considered during the appraisal process:

- Participation in guidance and counselling activities conducted at Institutional, District and State level;
- Adoption of innovative teaching and training methods;
- Improvement in result of vocational students of Class X or Class XII;

- Continuous up-gradation of knowledge and skills related to the vocational pedagogy, communication skills and vocational subject;
- Membership of professional society at District, State, Regional, National and International level;
- Development of teaching-learning materials in the subject area;
- Efforts made in developing linkages with the Industry/Establishments;
- Efforts made towards involving the local community in Vocational Education
- Publication of papers in National and International Journals;
- Organisation of activities for promotion of vocational subjects;
- Involvement in placement of students/student support services.
