

Teacher Training on Solar Energy Technology: 15-19 September 2025

The PSS Central Institute of Vocational Education (PSSCIVE), NCERT, Bhopal, organised a five-day “Training of Teachers on Solar Energy Technology” from 15th to 19th September 2025. The programme aimed to enhance the knowledge and technical skills of vocational teachers in the rapidly expanding field of solar energy.

A total of 29 teachers from various institutions across Madhya Pradesh participated in the training, which included hands-on sessions, practical demonstrations, and exposure to innovative solar technologies and applications. Conducted by the Department of Engineering and Technology, PSSCIVE, the programme focused on building teacher competencies for effective vocational education delivery aligned with emerging green technologies, thereby supporting India’s transition towards sustainable and renewable energy solutions.
